

EMILIE MURAT

RUBY ON RAILS FULL-STACK DEVELOPER

Ruby on Rails Full-Stack Developer with 4+ years of experience building and maintaining SaaS products in production. Product-minded and backed by a strong UX/UI background, I enjoy developing new features, improving existing applications and building useful, reliable products. I thrive in startup environments where autonomy, ownership and cross-functional collaboration matter.

CLOUD & DEVOPS : AWS (S3), Heroku, Docker, GitHub/GitLab CI
API INTEGRATIONS : Stripe, AWS (S3), Azure (Translator, Text-to-Speech)
OTHER TOOLS : Git, NPM, ChatGPT, Codex, JSON, Webpack
SOFT SKILLS : Ownership, Product-oriented, cross-functional collaboration

LANGUAGES

FRENCH: Native Language
ENGLISH: Advanced (CEFR C1 level)
SPANISH & GERMAN: Basic

INTERESTS

4+ years | Ruby on Rails • SaaS • Product

EDUCATION & CERTIFICATIONS

2025 PTE Academic - Score 67 (eq. IELTS 7.5 / CEFR C1) ***#Pearson***
2019 Ruby, Ruby on Rails & JS Certificates ***#OpenClassrooms***
2019 Full-Stack Web Development Bootcamp ***#Le Wagon***
2016 BTS Multimedia Graphic Design ***#AFIP Villeurbanne***

PROFESSIONAL EXPERIENCE

Freelance Ruby on Rails Developer | Feb 2025 – Present
- Designing and developing SaaS projects with Ruby on Rails, JavaScript and React, including payment service integrations.
- Using AI-assisted development tools such as ChatGPT and Codex to speed up development, debugging and refactoring workflows.
- Continuously improving personal projects with a focus on performance, security and code quality.

Full-Stack Developer – Drime | Feb 2021 – Apr 2024
Ruby on Rails, JavaScript (Vanilla, ES6, JQuery), PostgreSQL, AWS, Azure APIs, GitLab, Docker, Figma
- Built from scratch a multilingual SaaS platform for interactive video playback and editing.
- Designed and developed front-end and back-end features across the product.
- Created asynchronous processing pipelines with background jobs, enabling large-scale project generation.
- Integrated Azure Translator, Azure Text-to-Speech and AWS S3 for voice synthesis, automatic translation and media storage.
- Implemented a .drime JSON format powering the multilingual content editor.
- Led a complete UI/UX redesign across key product areas.
- Built smart dashboards, iframe generators and QR code generation tools.
- Contributed to the platform migration to Docker, AWS and GitLab alongside an external architect.

Full-Stack Developer - Pickaden | Mar 2020 - Feb 2021
Ruby on Rails, JavaScript, PostgreSQL, Heroku, GitHub, AWS, Sendinblue, Figma
- Developed new features for a real-time SaaS platform for childcare reservations.
- Integrated external services, including Sendinblue.
- Stabilized and debugged the initial MVP.
- Redesigned the search feature with improved UX/UI, filters and instant search.
- Improved performance across loading times, responsiveness & image handling.
- Built the full parent-facing reservation request flow.
- Implemented the management area for childcare providers.
- Improved the admin interface and added email notification features.
- Wrote Capybara system tests and SQL queries to monitor key product KPIs.

Ruby on Rails Developer - Hackathon du Cinéma | Dec 2019
HTML/CSS, Ruby, Rails, Git, GitHub, PostgreSQL

Ruby on Rails Mentoring – Rails Girls Saint-Étienne | Nov 2019
Ruby, Ruby on Rails, SQL, Git, PostgreSQL

Teacher Assistant - Le Wagon Marseille | Nov 2019
HTML5, CSS3, Bootstrap, Git
- Mentored students during a full-stack web development bootcamp.
- Helped students debug Ruby, Rails and JavaScript exercises.
- Reviewed code and explained core web development concepts.
- Supported students in building and deploying their final projects.

Vue.js Developer - Hackathon de Marseille | Oct 2019
Vue.js, HTML/CSS, Git, Illustrator
